Professional Experience

Ribatis

Java/JEE Design and Development Engineer

Sep 2024 - Present

Casablanca, Morocco

- Designed and maintained robust REST APIs using Java JEE, GlassFish, and JAX-RS for enterprise applications.
- Actively participated in full-stack development of [rokhas.ma](#) website (React) and Rokhas mobile application (React Native – iOS/Android).
- Co-developed the Karaz Single Window application presented at GITEX expo for its technological innovation.
- Architected the Karaz Authenticator application with secure TOTP code generation for MFA authentication.

Bank Al-Maghrib

Software Engineer Intern

Feb 2024 - Jul 2024

Rabat, Morocco

- Developed a digitization solution for backup and archiving processes using Spring Boot, Angular, and PostgreSQL.
- Reduced defects by 80% through automated testing implementation (JUnit 5) and reduced technical debt by 50% with SonarQube.
- Implemented complete CI/CD pipeline (GitLab, Jenkins) on AWS, with automated deployment via Linux Red Hat (SSH with MobaXterm), reducing production deployment times by 50%.
- Developed real-time dashboards increasing operational visibility by 30%.

OMDATA Consulting

Full-Stack Developer Intern

Jul 2023 - Aug 2023

Nantes, France

- Developed a dynamic website and administration application (PHP, JavaScript, HTML, CSS, AJAX, Bootstrap) improving restaurant online presence and operational efficiency by 30%.
- Managed database and deployed system on server for smooth online operation.

Technical Skills

Languages: Java / Jakarta EE, JavaScript, Python, C/C++, PHP, SQL

Frontend: React, Angular, React Native, HTML, CSS, Bootstrap

Backend: Spring Boot, Django, Node.js, Express.js

DevOps & Cloud: Docker, Kubernetes, Jenkins, GitLab CI/CD, AWS, Linux

Databases: PostgreSQL, MongoDB, MariaDB, MySQL, Oracle DB

Tools: Git, SonarQube, JUnit, Postman, REST APIs

Key Projects

Enterprise Document Processing System: Intelligent document processing system with OCR and AI
Django, PostgreSQL, RabbitMQ, Celery, AWS S3, Tesseract OCR, Machine Learning

E-commerce Microservices Application: Complete architecture with API gateway and containerized deployment
Spring Boot, React, PostgreSQL, Docker, Kubernetes, Spring Cloud Gateway

Smart Home Management System: IoT system with secure authentication and real-time monitoring
Spring Boot, Angular, PostgreSQL, MongoDB, Docker

Education

National School of Applied Sciences

State Engineer in Computer Science - Software Engineering Specialization - Good Honors

2021 – 2024

Al-Hoceima, Morocco

Moulay Youssef High School

Preparatory Classes for Engineering Schools (CPGE) - Mathematics and Physics Option

2017 – 2021

Rabat, Morocco

Salama Mossadeq High School

Baccalaureate in Physical Sciences - Very Good Honors

2016 – 2017

Salé, Morocco
